July 2020 | FreeCodeCamp

MASTER OF MUSIC IN JAZZ PERFORMANCE

June 2010 | University of Toronto

Profile

I am a front-end web developer whose passion is to build accessible and responsive user experience with HTML, CSS, JavaScript and React. With a background in teaching university music courses and producing chart-topping albums, I have developed a consistent work ethic, strong communication skills, and problem solving techniques.

Projects

ENGRAM [View Live](#) React | Firebase | SPA | SASS

- Bookmark tracking system with OAuth and multi-page routing
- User can group, rate, count read and add note to bookmarks
- Firebase back end to store user info & data

TRAXMETA [View Live](#) TypeScript | OOP | jQuery | Rest API

- User can select from Spotify's Global Top 100 playlist and display track metadata
- Used lambda function to implement server-side tasks.

TIMESCRAFT [View Live](#) TypeScript | Next.js | Redux

- Math-learning game with characters from Minecraft
- Originally built with jQuery then converted into Next.js
